About us

eyebright is a leading utilities management company, based in Glasgow with offices across the UK. Established in 2009 and with a combined experience in the energy, telecoms and water industries of several decades, we bring a wealth of experience and know-how to the table.

Our proactive, end-to-end approach to managing your utilities and our market intelligence services will allow you to stay in control with minimum time commitment.

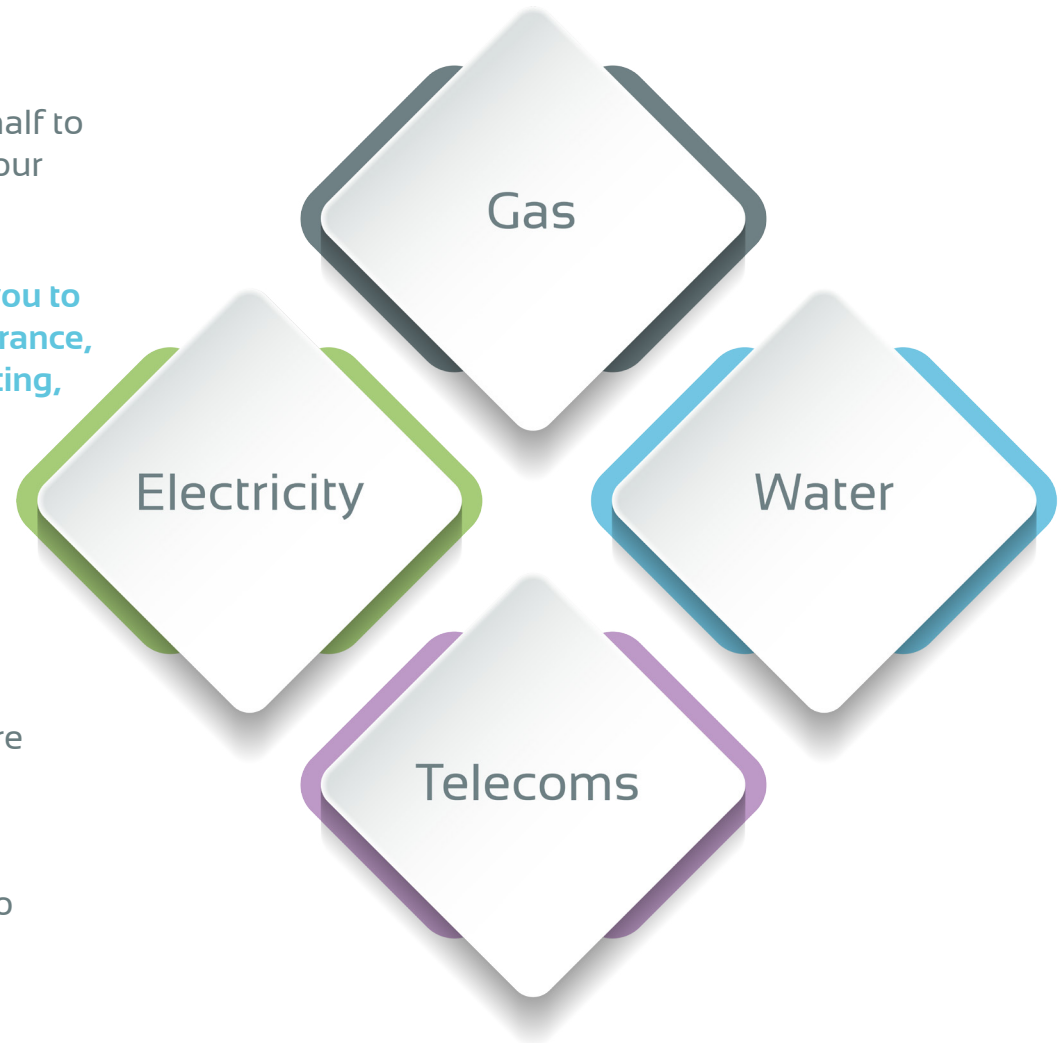

Procurement

Comparing over 30 different suppliers we'll work on your behalf to achieve the best terms, price and contract length based on your requirement.

Our services go further than finding the best price, we assist you to achieve the right payment terms, contract length, volume tolerance, full source, supply stability, billing format, consumption reporting, invoice validation and dispute resolution.

Fixed vs flexible contracts

For our medium to large energy intensive clients we can implement, manage and monitor flexible energy contracts. Flexible contracts, unlike a fixed price agreement, mean you're not committing to purchase the commodity on the date of signature. If your energy consumption is 2GWH or more, we can work with you to create a bespoke proposal that meets your needs and invite our panel of flexible energy suppliers to tender for your business.

Renewable generation

We can help you explore REGOs, Power Purchasing Agreements (PPAs), export agreements and complete on-site generation solutions. The right strategy for your organisation will depend on your objectives, however we can assist you to implement wind, solar, biomass, green gas, CHP and hydro energy solutions.

We've assisted some of the UK's largest firms with their renewable generation strategies. From conception to implementation and management, we're ready to support you.

Renewable solutions

Organisations transitioning to renewable energy benefit from a fantastic return on investment, more control over their energy costs, an ability to sell their surplus electricity back to the grid and have also been able to enhance their green credentials.

Solar has been the most popular renewable energy solution over the past 5 years. This can generate most, if not all, of your required electricity and the initial outlay can be repaid within 4 years. We can assist you with a feasibility study, implementation, PPA and ongoing management.

Water management

Our specialist water consultancy experts provide a comprehensive service that includes auditing your historic and current invoices for overcharges, procurement and water efficiency.

01

Water Auditing

Our consultants have recovered over **£4 million** worth of overpayments on behalf of our customers. Have you been overcharged?

02

Procurement

Source the right water contract for your organisation. Our extensive panel of suppliers means we'll be able to source the right contract for you.

03

Water Efficiency

Help your business become more water efficient with our assistance. Our support includes leak detection, smart metering and supplementary services.

Compliance & government regulations

Some businesses across the UK are obligated to meet compliance regulations under Streamlined Energy And Carbon Reporting (SECR) and The Energy Savings Opportunity Scheme (ESOS). We can assist you with your application and reporting for SECR and ESOS alongside managing your Energy Intensive Industries (EII) Exemption Scheme, Climate Change Agreement (CCA) and Climate Change Levy (CCL) relief.

New connections and siteworks

Our dedicated and experienced energy services team can manage any new connection and sitework projects across all utilities. This includes new gas, electricity and water meters, new connections to the grid, disconnections, meters exchanges, meters removals and supply upgrades.

Our team of project managers will oversee all aspects of any new connections and siteworks projects, managing the end to end process and updating you throughout each stage of the journey. Our support here will save you time, money and alleviate frustration.

Talk to us today to find out more about our dedicated new connection and siteworks service.

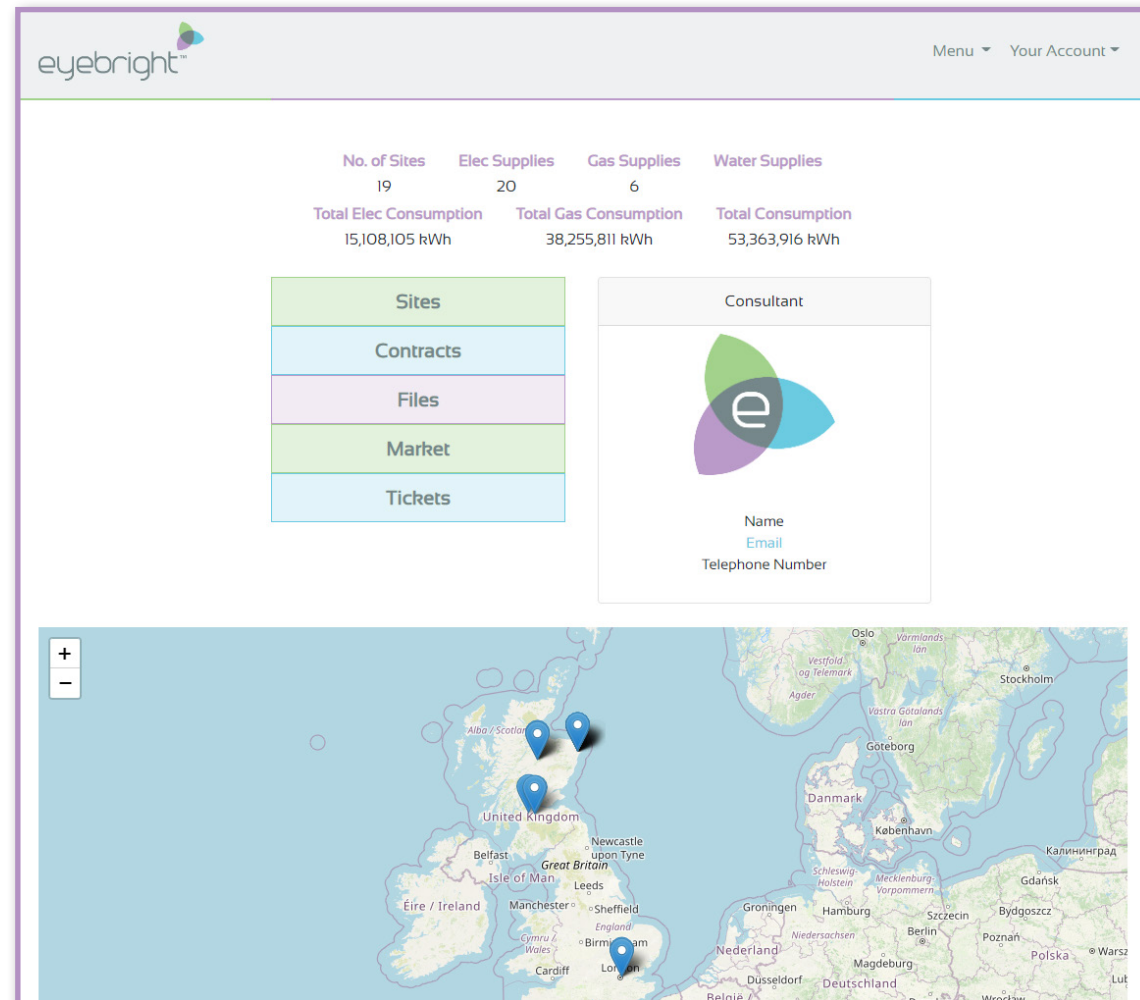

Revolutionary technology

Our custom-built, proprietary technology enables you to better understand your energy consumption and carbon footprint. You can manage utility contracts, raise tickets for support, receive market updates and file invoices as well as utility documents for bill validation.

Our unique software is essential if you:

- Have multiple meters in one property
- Have multiple sites as part of your business
- Want to monitor and improve your carbon footprint
- Want to better understand your energy consumption
- Struggle to manage your utility contracts
- Need to give multi-level access to various employees in your business
- Operate in the property management industry
- Require regular support and data analysis
